WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 184
PAGE 1

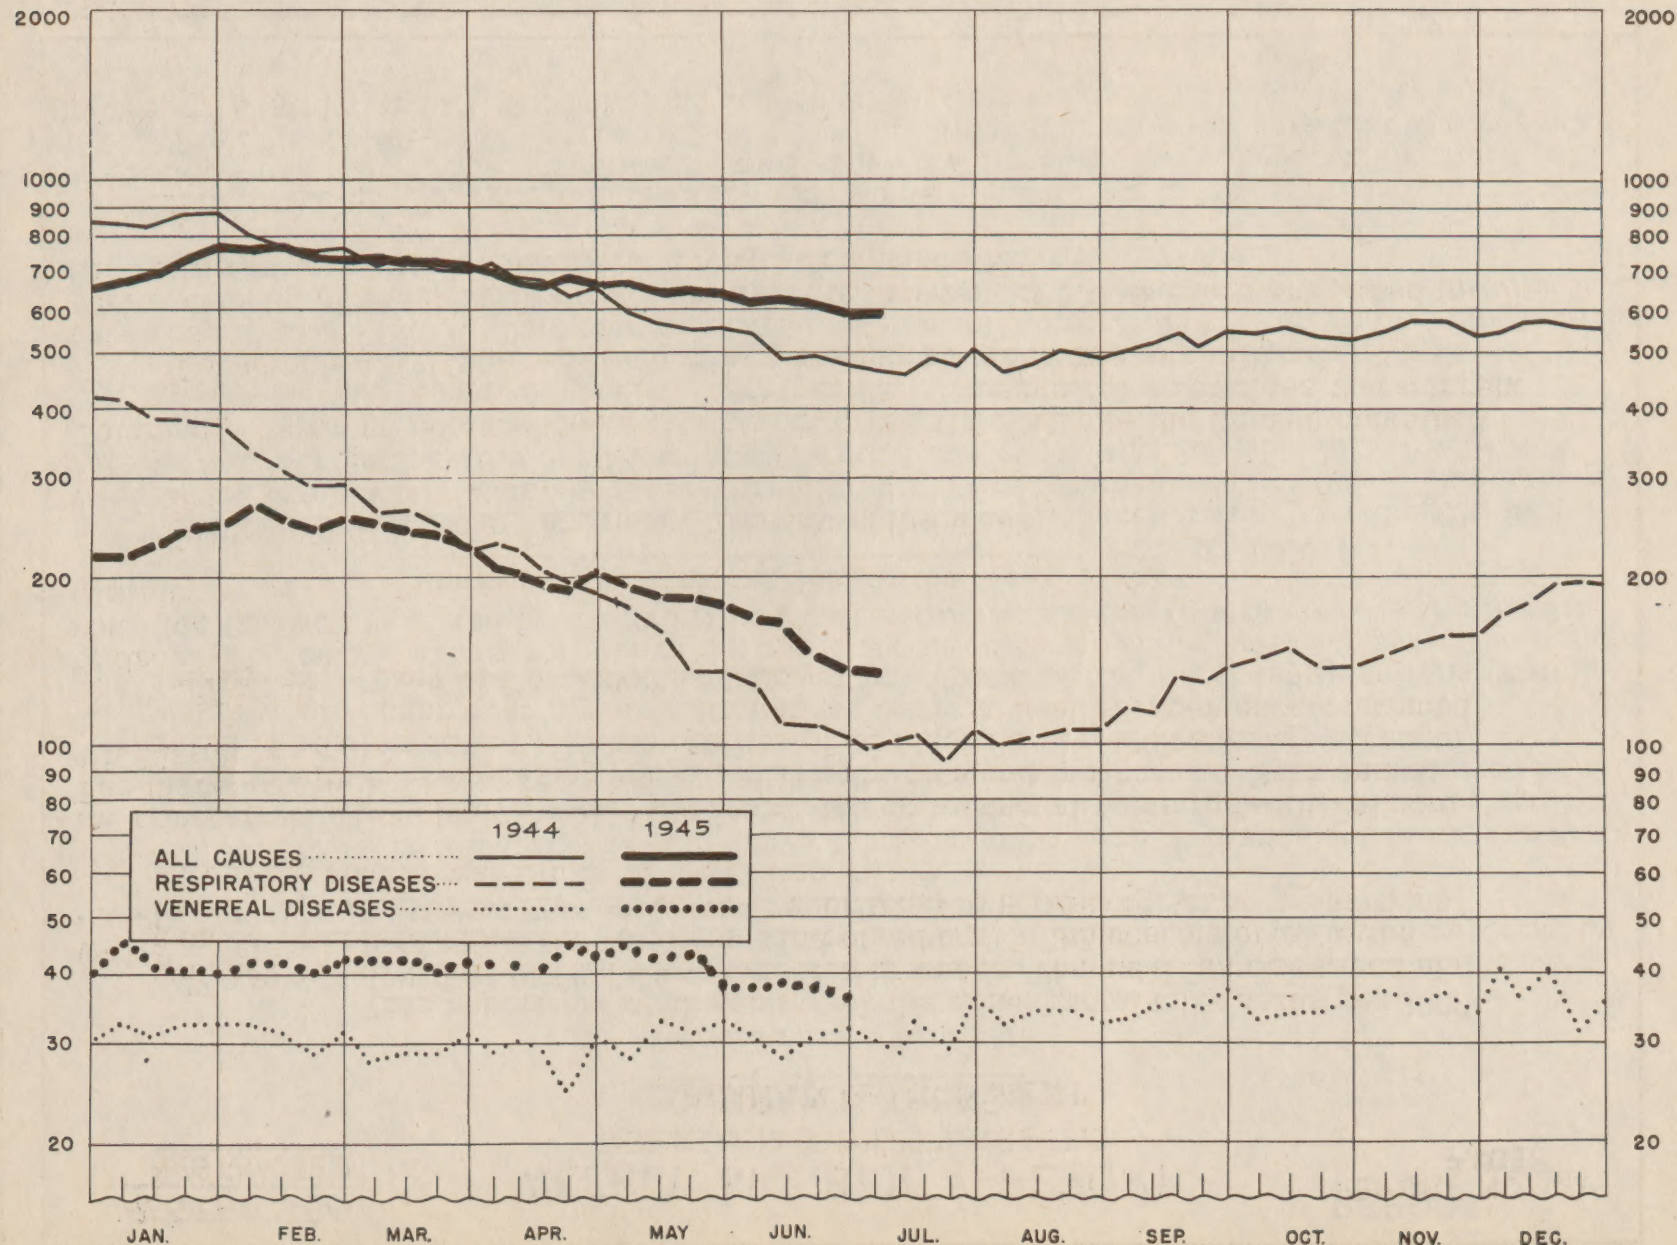

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States..

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 7 July 1945

The admission rate for All Causes rose this week. The rate 592 compares unfavorably with the rate 466 for the corresponding period of 1944. The highest rate (690) was reported by the 9th District; the lowest rate (402) was reported by the 7th District.

Although the respiratory disease curve continues downward, it stands above the curve for the corresponding period of 1944. The trend was up in four districts; the 1st, 7th, 11th, and 12th. The highest rate (230) was reported by the 9th District; the lowest rate (41) was reported by the 4th District.

Influenza and Catarrhal Fever, Acute. The admission rate for these infections continues to drop. The curve stands well above the curve for the corresponding week of 1944. The highest rate (144.00) was reported by the 3rd District; the lowest rate (19.00) was reported by the 4th District.

Pneumonia--Broncho and Lobar. The rate for these diseases was reported again this week at 2. The curve stands above the curve for the corresponding week of 1944. The highest rate (7) was reported by the 3rd District. The 4th District and the Potomac and Severn River Commands reported no cases.

Pneumonia, Atypical. After having been reported at 2 for three consecutive weeks, the rate rose this week to 3. This rate compares unfavorably with the rate 2 for the corresponding period of 1944. The highest rate (7) was reported by the 11th District. The 1st, 4th, and 7th Districts and the Potomac and Severn River Commands reported no cases.

Tonsillitis and Pharyngitis, Acute. The admission rate for these diseases was reported again this week at 47. The curve stands well above the curve for the corresponding week of 1944. The highest rate (111) was reported by the 9th District; the lowest rate (22) was reported by the 4th District and the Potomac and Severn River Commands.

PAGE 4

CURRENT TRENDS CONT'D.

Scarlet Fever. After having been reported at 5 for the past two weeks, the rate this week dropped to 4. The trend was upward in five districts, the 1st, 3rd, 7th, 11th, and 13th. The highest rate (20) was reported by the 9th District. The 4th, 6th, and 11th Districts, and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this disease showed a slight rise this week. The rate stands above the rate for the corresponding period of 1944. Only three Districts reported cases, the 5th, 6th, and 9th.

Measles. The admission rate is reported again this week at 2. This rate 2 continues at the level for the corresponding week of 1944. The highest rate (5) was reported by the 11th District. The 4th, 7th, and 13th Districts, and the Potomac and Severn River Commands reported no cases.

Poliomyelitis, Anterior Acute. One case was reported this week by the Continental Shore Stations, which occurred in the 6th Naval District. The cumulative total of poliomyelitis reported for all Continental Stations, January 1, 1945 through July 7, is 10 cases.

The U. S. Public Health Service reports for this week show the civilian cases in the six States with the highest incidence distributed as follows:

New York	21	Tennessee	18
Texas	21	New Jersey	10
California	18	Connecticut	7
